

PROFILE

Hello, My name is Cheyne "Shane" Sutherland and I am a hard-working, self-motivated multimedia designer seeking a full-time position in a company where I get to make cool stuff. I am able to communicate ideas quickly and effectively and work well in a group or by myself to ensure that the project is completed on time and under budget. I'm a strong believer in working hard and playing hard.

TECHNICAL PROFICIENCIES

SPECIALTY SKILLS

Photo-Manipulation
Compositing
Iconography
Mock Ups

OTHER SKILLS

Photography
HTML 5, CSS 3, & PHP
Fast Visual Learner
Play Music By Ear

EXPERIENCE

CYBER SYTES, INC. [2011 – PRESENT]

After a while, I moved back to Panama City Beach and found work at CYber SYtes, Inc. as a web designer. There, I learned a lot from the other talented designers about designing websites using WordPress and coding in PHP. I also got to make various logos, flyers, and illustrations for the company as well.

LUCID DREAM DESIGNS [2010]

The work I did for Lucid Dream Designs was mostly photography and retouching. There was one project where I had to create a 3D globe animation and implement it into a flash website template. The other jobs included taking pictures of products such as knitted scarves and hats and retouching portrait shots for a client's website.

AERO PRECISION ENGINEERING [2009]

This was a freelance job for a company in Los Angeles that manufactured Airplane parts. They needed a logo for their company and banner for their website.

FACILITY B5D [2009 – 2010]

As lead graphic designer for the gaming website FacilityB5D.com, I had to create various logos, banners, and other graphic elements for the website.

GULF BEACH BAPTIST CHURCH [2006 – 2009]

While working for Gulf Beach Baptist Church, I was charged with creating a new logo for the Student Ministry, making flyers and posters for local events, and even a water bottle label design. Almost all of this work was done in exchange for college credit and experience.
